HARDINESS ZONES OF THE UNITED STATES

MAP OF CLIMATIC ZONES 3-8

After each plant name, zone of hardiness is indicated.
Many other factors besides winter temperature influence the hardiness and growth of certain plants.

FOREWORD

ONCE again as the fall season approaches we send you our catalogue and with it our most cordial invitation to visit our nurseries and inspect our unusually complete line of quality ornamental stock. For those customers too distant to visit Princeton we take special care to insure that this fall catalogue lists, describes, and illustrates as accurately as possible the remarkable collection of woody ornamentals which we grow.

We were gratified to see that our many plant market customers enjoyed a pleasant increase in business last spring. We were especially pleased because it confirms our belief that an aggressively managed plant market with a sales force of trained plantsmen can hold its own in the face of discount non-nursery competition where price is the only inducement to buy. It bears out the findings in other merchandising fields that the well run specialty store which sells service and knowledge rather than "bargains" is a stable and profitable business venture.

Our landscape customers also reported very substantial increases in sales this past season. Not only did the size and quantity of home landscaping jobs increase, but there was also a much greater volume of industrial, municipal and public works jobs. More and more, these landscape specialists are relying on the complete range of landscape materials, fair prices, and cost-cutting complete deliveries which we make available. Our modern storage buildings and meticulous care during order digging and assembly give an absolute minimum of costly on-the-job replacements.

We at Princeton Nurseries concentrate on supplying both these segments of the nursery business. We are convinced that a profitable future stretches ahead for the aggressive, intelligent retail nurseryman and the skillful landscape firm. We hope you will call on us to help you solve your supply and merchandising problems. We hope you will be a frequent, and we know you will be a welcome, visitor here at Princeton.

Sincerely,

WILLIAM FLEMER, JR.

SUMMER SHADE MAPLE

(Plant Patent #1748)

Princeton's new rapid-growing, upright Norway Maple.

SUMMERSHADE MAPLE

(Plant Patent #1748)

ACER platanoides Summershade. 60'-75' (Zone 3)

The new rapid-growing, heat-resistant, upright Norway Maple, developed at Princeton Nurseries.

For over a decade we have been working with Norway Maples to produce a variety especially adapted to adverse hot weather areas. This new Summer-shade Maple is the most outstanding Norway Maple we have ever seen—the best of over 120,000 plants we have evaluated. The very dark green foliage is larger and more leathery than in other kinds, and it resists wind-burn and insect injury. It is retained 10 to 14 days later in autumn than regular Norway Maples. The tree grows much more rapidly, is a self-branching type, and quickly forms a shapely, upright head with the leader maintained to the top.

Its superior growth rate, form and foliage will make money for you.

ACER rubrum October Glory. 50'-60' (Zone 4) October Glory Maple
(Plant Patent #2116)

After years of effort we have developed this beautiful new tree, which is the finest of its type. Many Red Maples do not develop good fall color on any but the most favorable sites, and shed their leaves early in the fall. October Glory is a new variety which always turns a brilliant crimson-red in the fall. The leaves are retained long after all other Red Maples have defoliated, usually up to Thanksgiving Day at Princeton. Your customers will be delighted by the shapely head, lustrous foliage and spectacular fall color of this splendid new tree.

GLEDITSIA SHADEMASTER—Princeton's Upright Thornless Honeylocust. Plant Patent #1515. Picture shows $3\frac{1}{2}$ seasons' growth after planting a $1\frac{1}{4}$ -in. caliper tree. Back screen is 16 ft. wide and 18 ft. high.

At Princeton we have trees that have been planted six years and are more than 30 ft. tall, with a trunk caliper of more than 6 in.

SHADEMASTER LOCUST

PRINCETON UPRIGHT THORNLESS HONEYLOCUST

(Plant Patent #1515)

(Zone 4)

For many years there has been a growing need for new and better shade trees. We have been striving to produce a Thornless Honeylocust with all the characteristics which are evident in the photographs on pages 34 and 36, and to eliminate all of the faults common in ordinary Honeylocusts. We have painstakingly examined over 20,000 individual trees in this program. Our long effort has resulted in the development of what we and our visitors proclaim to be the **FINEST THORNLESS HONEYLOCUST AVAILABLE.**

We were assisted in our final selection by a large panel of expert professional arborists. (The Princeton Upright Thornless Honeylocust was for many years the famous Number 13 in our research program.)

Its outstanding characteristics are:

- | | |
|-----------------------------|--|
| 1—Straight, strong trunk | 9—Holds foliage late in the fall |
| 2—Ascending branches | 10—Deep roots |
| 3—Heavy, dark green foliage | 11—Does not heave sidewalks |
| 4—Requires no staking | 12—Grass will grow right up to the trunk |
| 5—Rapid growth | 13—No leaf raking in the fall |
| 6—Transplants easily | 14—Forms unbelievably symmetrical |
| 7—Freedom from diseases | tops—a radical departure from |
| 8—Drought resistance | other Honeylocusts |

TILIA cordata Greenspire (Plant Patent #2086) Greenspire Linden. Nurserymen and Arborists who have seen this year's block of Greenspire agree with us that it is without question the finest of all the Lindens. Reserve your supply promptly because this splendid NEW TREE sold out early last spring.

TILIA cordata Greenspire

(Plant Patent #2086) 70' (Zone 3)

Greenspire Linden

After many years of development, we proudly present the Greenspire Linden (Plant Patent #2086). It has small leathery foliage and rapidly grows into a regular narrow-oval form. Unlike other littleleaf European Lindens, it forms a perfectly straight trunk without costly staking and pruning. The branches are placed radially around the trunk so that even small trees have a shapely head. The spicy fragrance of the flowers is an added asset.

You will be delighted with the rapid growth and profitable demand for this remarkable new tree.

How to prune your Princeton Trees for planting

During the transplanting process, trees of necessity lose a small portion of the root system they formerly had. To insure rapid, vigorous growth in their new location, the top should be pruned back so that there is a favorable balance of root over top. Damaged branches should be trimmed off below the point of injury. The central trunk or "leader" should be left intact to build a high crown and the side branches should be shortened by at least one-half their length. This seems harsh treatment but the rapid re-growth which results more than justifies it. Broken roots should be cut off above the break and bruised ends cut off cleanly, for they will regenerate more rapidly.

After Trimming

SALES YARD SUGGESTIONS

A properly managed sales yard, or plant market, can be a very profitable operation.

The following suggestions are made to assist you in selecting popular quick-selling varieties and in handling them successfully in your establishment. We will be pleased to help you select the very best plants for your own particular location or requirements.

FLOWERING SHRUBS

Flowering shrubs established in pots or containers are easy to handle, solve your replacement problem, and give you a very long selling season. Moreover, the plants steadily improve in appearance and fullness as the selling season advances. **Pot as early in spring as possible.**

In potting shrubs a No. 2 Cloverset, or similar sized pot is good for the average size shrub. Use a mixture of $\frac{1}{3}$ fibrous peat, $\frac{1}{2}$ loam or good top soil and $\frac{1}{3}$ sand. Spread the roots evenly in the pot and firm the soil as the pot is filled. Leave a rim of pot 1 to 1 $\frac{1}{2}$ inches above the soil to facilitate watering.

After potting, soak well with a liquid fertilizer at about $\frac{1}{4}$ the strength the manufacturer recommends. Place potted plants in a lath house, shaded cold greenhouse, or in a well-sheltered area. Shift plants and space out as foliage develops. In caring for all potted material, water thoroughly often enough to keep the soil moist and mellow, but definitely not wet and soggy. Apply liquid fertilizer once a month after growth starts.

EVERGREENS AND OTHER BALLED AND BURLAPPED PLANTS

Balled and burlapped plants are, of course, "tailor made" for the plant market. They are in good demand and are easy to handle.

Display them under a lath house, or in a suitable partially shaded or protected area. Cut the strings around the branches as soon as they are received. Heel the balls in neat beds of peat moss or sawdust. Moderately raised beds make the plants appear at their best. Label each plant individually as to variety and price.

As soon as active growth begins in the spring, spray every two weeks with a foliar feeding spray at $\frac{1}{2}$ the manufacturer's recommended dilution, or inject the mixture into the balls with a root feeding needle. Plenty of nitrogen is necessary to maintain good foliage color in B&B plants growing actively.

The following list covers the most popular and profitable varieties.

SHADE, ORNAMENTAL AND FLOWERING TREES

New housing has created a remarkable demand for shade and flowering trees. Sales yard operators can capitalize on this demand because potted trees are easy to handle, thrive after planting and can be sold throughout the entire spring season and on into summer. It is best to pot small sized trees for the cash and carry business. Large sizes require too heavy a container and will not go in or on a passenger car.

For potting small trees, the No. 4 Cloverset pot or its equivalent is a good size. Use the same potting soil mixture and procedure as for shrubs. After potting, soak thoroughly with liquid fertilizer at $\frac{1}{4}$ the strength the manufacturer recommends.

Place potted trees under a high lath shade, or in a protected location and space out as foliage and branches develop. Stake slender or weeping trees with a light bamboo cane. Fertilize with liquid fertilizer once a month.

The following list of trees covers the best varieties for potting, and the sizes recommended are easily re-established and handled.

CONDITIONS OF SALE

PRICES

The prices named in this list cancel all previous lists. They are based on current market conditions and are subject to change without notice.

TERMS

PRICES F.O.B. NURSERY AT KINGSTON, N. J.

To those with an established record for prompt payment or with satisfactory references, we are glad to extend our regular terms at thirty days from date of invoice. Others will pay for stock on pickup or delivery.

2% DISCOUNT will be allowed for payment in ten days from date of invoice. Overdue accounts are subject to a 6% per annum service charge, plus costs of collection if any.

MINIMUM ORDERS

Because of ever-increasing labor and other costs we are forced to request that all orders be for at least \$25.00 per order. A careful cost accounting has shown that we lose money on smaller volume orders than this because the office and assembly costs are much the same for large or very small orders.

Orders for **shipment C.O.D.** must be accompanied by a remittance for one-third of the amount to insure acceptance. These are our only terms, and no salesman or representative is authorized to alter them in any way unless confirmed from the office in writing.

GUARANTEE OF GENUINENESS

We will send out healthy, thrifty stock, true to name. If any nursery stock proves untrue to description or variety name under which it is sold, we hold ourselves in readiness, on proper proof, to replace free of charge such stock that may prove untrue to description or name, or refund the original amount paid. We shall in no case be liable for any sum greater than the amount originally received for said stock.

CLAIMS

All sales are made with the understanding that we shall not be liable in event of crop loss or of damage from other causes over which we have no control.

We will gladly correct any errors, but we cannot entertain any claims that are not made within thirty days after receipt of the stock or are made after the stock has once been accepted. Claims should be made promptly in writing on receipt of stock. In any case, no claims will be considered regarding orders which have not been paid for in full according to our regular terms of thirty days from date of invoice.

Plants become your property upon delivery to transportation company, and we cannot be responsible for loss, damage or delay in transit.

All orders booked are based on the distinct understanding that the purchaser agrees to the condition of sales as stated above.

DELIVERY SERVICE

Although we maintain and operate a number of trucks for delivery of our orders and for which a reasonable charge is made, it is very difficult for us to attempt to deliver the vast volume of material we produce, and we strongly urge that our customers send their own trucks, or hire local trucks, to pick up their orders here at the nursery as soon as we send notification that orders are ready.

When you send your trucks for material, we will be very glad to load the stock carefully with our help and to supply ample quantities of good damp packing material, without extra charge. We will handle the loads to the best of our ability and can even make arrangements to load your trucks in the evening, if necessary.

Be sure to bring tarpaulins or suitable coverings to protect the plants on the truck, so they will not dry out on the road.

If it is necessary for us to supply covering material and rope, it will be charged for at cost.

DELIVERY CHARGES ARE NET AND DUE WHEN STOCK IS DELIVERED.

DELIVERING AGENT OR DRIVER WILL COLLECT THIS CHARGE WHEN DELIVERY IS MADE.

“CARLOADS” AND FREIGHT SHIPMENT

With our own railroad siding connecting with the main line of the Pennsylvania Railroad and a daily pickup service on L.C.L. and express shipments, we are in a position to expedite shipment to you without delay. Consult your local agent for rates to Monmouth Junction, N. J., or write us and we will gladly take care of it for you.

SCHEDULE OF B&B CHARGES

The following charges are made to cover additional cost of balling and bur-lapping deciduous trees and shrubs that are not listed B&B. The size of ball for most stock is in accordance with the A.A.N. "Horticultural Standards" recom-mendations.

These charges are based on a **carefully dug**, solid ball of earth, laced with rope or wire, and handled according to the best nursery practice.

TREES, SHRUBS AND SMALL TREES

Diam. of Ball	Size	Estimated Weight	Each
10"	18/24"	30 lbs.....	\$0.80
12"	2/3'	45 lbs.....	1.25
13"	3/4'	60 lbs.....	2.00

18"	6/8'	150 lbs.....	5.00
21"	8/10'	225 lbs.....	7.00
22"	1½ to 1¾" cal.	260 lbs.....	8.00
24"	2" cal.	300 lbs.....	9.00
26"	2¼" cal.	450 lbs.....	10.00
28"	2½" cal.	600 lbs.....	12.00
32"	3" cal.	750 lbs.....	16.00
36"	3½" cal.	1150 lbs.....	20.00
40"	4" cal.	1600 lbs.....	25.00

The above charges apply only F.O.B. NURSERY. We will be glad to esti-mate a delivered price based on the terms of delivery noted below.

Ball depth will normally be not less than 60% of the diameter, and in all cases is adjusted so as to encompass a maximum of the fibrous root system of the plant.

BOXING CHARGES

Length	12x15"	15x16"	17x20"	19x24"	23x28"	27x32"	32x36"

14'	4.90	5.60	6.65	8.40	9.10	10.50	12.60

Packing charges are at cost and represent the actual cost of the material used in the operation. No charge will be made for loading bulk truck or car lots.

COME TO SEE US

If you come by rail, use Pennsylvania Railroad and get off at Princeton Junction. Call WALnut 4-1776 (Area code 609). We will send a car for you.

If you come by automobile our nurseries are on U. S. Highway No. 1, about ten miles northeast from Trenton. Watch for our signs.

If traveling on New Jersey Turnpike from the south, use Exit 8 (Hightstown) or, if traveling from the north, use Exit 9 (New Brunswick). Route 1 can be reached easily from either exit.

NOTES IN EXPLANATION OF CATALOG

The figures following each variety indicate in feet the approximate height of that plant at maturity. Ample allowance has been made for the many physical factors that tend to modify the growth of plants in cultivation.

The botanical and common names are largely taken from the 1942 edition of "Standardized Plant Names." Changes in nomenclature according to the revised "Second Edition," which have not become generally familiar to the trade, are shown in parenthesis and cross-indexed for reference.

ZONES RELATIVE TO HARDINESS—Following the ultimate height shown for each variety, you will find a number covering the most northern zone where that particular variety is considered hardy. See **Hardiness Zone Map, on the inside front cover.**

Our standard of grading all plants is based on a schedule which has been adopted by the American Association of Nurserymen.

To facilitate the handling of orders and to enable us to render you quicker and better service, we desire where possible, especially in deciduous material, that orders be made in multiples of 10. Many varieties are tied in 10's when graded. Your cooperation will be appreciated.

SEE "A HELPFUL SERVICE," PAGE 91

As you will notice in our catalogue, we have added to our container production to give our customers a wider selection of well grown container plants. This selection will enable the garden center operator to carry a wide variety of easily handled, well grown, eye catching plant material. It will also allow the landscaper to plant out a better grown plant that does not have to be disturbed by balling and burlapping when transplanted.

BROADLEAF SPECIALISTS

Princeton Nurseries is affiliated with the Ingleside Plantation Nurseries, Oak Grove, Virginia, generally acknowledged to be the best broadleaf evergreen growers in this country today. As their northern representative, we are in a position to supply, from our combined stock, the most complete inventory of woody plants in the trade.

Weekly deliveries to Princeton throughout the busy season assure you of prompt service. Economical truckload deliveries direct to your nursery from Virginia can be easily arranged.

Write us or phone WALnut 4-1776 (Area code 609) for details.

SPECIAL OFFER

ASSORTED SHRUBS, EVERGREENS and TREES

Our selection includes all desirable varieties for landscape plantings.

Many of our customers have asked for assorted plants where the varieties do not have to be specified. We are, therefore, offering two groups of shrubs, five groups of evergreens and three groups of trees this season. The varieties used will naturally be made up of items that we have in good supply at the time.
